P.04

MAY 17 2007

Application No: 10/724,711 Attorney's Docket No: ALC 3101

CLAIM AMENDMENTS

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

1. (Currently Amended) A method for of an active connection modify in a connection oriented communication network, comprising the steps of:

appending a trace transit list information element (TTL IE) to a modify request message; transmitting said modify mequest request message from a source node to a destination node along said active connection; and

at each node along said active connection, modifying a parameter of said active connection while recording in said TTL IE failure identification data.

2. (Original) The method of claim 1, further comprising:

generating a Modify Reject message at a node along said connection if said node does not enable modification of said parameter;

updating said TTL IE from said modify request message with failure cause information; and

appending said TTL IE to said Modify Reject message and returning said Modify Reject message to said source node.

Application No: 10/724,711 Attorney's Docket No: ALC 3101

- 3. (Original) The method of claim 1, wherein said failure identification data includes the logical node and logical port trace of the failed modify request.
- 4. (Original) The method of claim 1, wherein said failure identification data includes failure cause information.
- 5. (Original) The method of claim 4, wherein said failure cause information includes vendor specific information.
- 6. (Currently Amended) The method of claim 1, wherein said parameter is the bandwidth allocated to said active connection.
- 7. (Currently Amended) The method of claim 1, wherein said failure to modify identification data includes the capability of a node along said active connection to support the modify modification of an active connection of said parameter.
 - 8. (New) The method of claim 1, further comprising:

generating a Modify Acknowledgement message at said destination node if all nodes along said connection enable modification of said parameter;

transmitting said Modify Acknowledgement message to said source node; and

Application No: 10/724,711
Attorney's Docket No: ALC 3101

transmitting traffic from said source node to said destination node along said connection with said modified parameter.
